

# Taking Care of the **Ocean**

by Jay Dale

Lots of sea animals live in the ocean.  
Can you find **all** the sea animals?

We have to take care  
of the ocean.

Look at the *plastic bottle*.

Look at the *plastic bag*.

Lots of old plastic bottles and plastic bags get into the ocean.

You can see old plastic bottles  
and plastic bags on the *beach*, too!  
This *garbage* is not good for the beach,  
and it is not good for the ocean.

Garbage is not good for the sea animals  
and plants that live in the ocean.

It makes the animals and plants sick.

Look at this *seal*.

The garbage is in its home.

The garbage will make the seal very sick.

Look at this *turtle*.

This turtle is eating a plastic bag.  
The plastic bag looks like a *jellyfish*.  
The plastic bag will make  
the turtle very sick.

We have to take care of the ocean.  
We want to see lots and lots  
of sea animals and plants  
in the blue ocean.

The blue ocean is lots of fun for us, too!  
We can *swim* and play in the ocean.  
Let's all take care of the ocean.
